

PIO broiler monitoring dataset

Dense broiler-house monitoring
in practical farm conditions

Images **1,487**

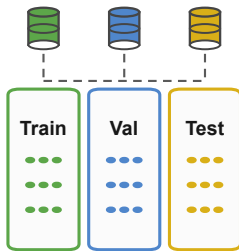

Instances **327,288**

Inst./image **220.10**

Dataset basis for
resolution selection

Leakage-controlled split

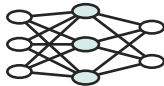

Source A Source B Source C

Remove duplicates
Group-aware split
Balance density

Controlled resolution experiment

Detector: YOLO11n

...

800 / 960 / 1280 px

Resolution
varies only

Evaluation outputs

Detection performance

- AP / AP50
- max_det

Scale-density analysis

- ordinary AP
- strict AP

Counting reliability

- bootstrap CIs

Deployment efficiency

- latency
- VRAM
